

Avery Dennison Ink Recommendation Guide

Instructional Bulletin # 8.55

Revised 07NOV05

Compatibility & Durability:

Avery Dennison recommends the use of the following series of inks to assure user satisfaction and conformance with warranty requirements. Because the choice of ink series can determine the durability, transparency and sign reflectivity level, it is important that the correct series of ink be matched with the reflective sheeting used. Differing environmental conditions found in specific regions of the country may result in the ability of Avery Dennison to increase the period of ink durability and warranty for select ink colors and series. Any exceptions to the information contained below must be confirmed in writing by Avery Dennison to become binding. Please contact Avery Dennison for further information.

Application & Conversion:

Complete information to the user for proper application, storage, and other requirements is available from your Avery Dennison representative, from the Avery Dennison web-site www.reflectives.averydennison.com, or on request. Please reference the Instructional Bulletin number for each series of ink shown in the charts.
